GENERAL INFORMATION

SUPRA-PLEX LIQUID IRON is a proprietary blend of soluble micronutrient(s) and an organic complexing agent so as to enhance and maintain availability and accelerate uptake by crops.

SUPRA-PLEX LIQUID IRON is non-phytotoxic and can be applied foliar to most crops. It is recommended for use throughout the season in a program of multiple applications for greater efficiency. This provides a continuous supply of vital nutrients at or near the time they are needed most.

SUPRA-PLEX LIQUID IRON is environmentally safe, made with only “clean” raw materials free from heavy metal contamination.

DIRECTIONS FOR USE

SUPRA-PLEX LIQUID IRON can be added to most nitrogen solutions or fluid fertilizers and impregnated on dry blend fertilizer. It can be tank mixed with most pesticides. Always make a small-scale test to assure compatibility. It can be soil or foliar applied, broadcast or banded over the row and injected through irrigation systems. **CAUTION: DO NOT USE IN HIGH PHOSPHATE “STARTER” OR “POP-UP” FERTILIZER MATERIALS SUCH AS 10-34-0.**

SUPRA-PLEX LIQUID IRON will disperse in water with minimal agitation. It serves as a buffer when used in tank mixes with pesticides. Follow the mixing sequence: 1. Water; 2. SUPRA-PLEX LIQUID IRON; 3. Pesticide.

RECOMMENDED RATES

The optimum rate and timing of application will depend on local conditions and should always be made as a result of soil and/or plant tissue analysis in consultation with your local agricultural authorities. In the absence of test results, use the following as a guide:

Broadcast:

Severe Deficiency.....4-6 qts. per acre

Moderate Deficiency.....2-4 qts. per acre

Maintenance.....1-2 qts per acre

Banded over the row: Apply 2-4 qts. per acre. Repeat as necessary if deficiency persists.

Foliar Application: Apply 2-4 qts. per acre. Repeat as necessary if deficiency persists. Use sufficient water for thorough coverage. Ground: 10-20 gals. per acre. Air: 3-5 gals. per acre. If less water is used, slight burn may occur. Spray either early or late in the day for maximum leaf absorption.

WHAT TO DO IN CASE OF CONTACT

If Ingested: Give large amounts of water or milk, if conscious. Contact a physician immediately.

Eye Contact: Flush eyes with clean water for 15 minutes. Seek medical attention immediately.

Skin Contact: Remove contaminated clothing and wash skin with soap and water. Seek medical attention if irritation develops or persists.

If Inhaled: Move to fresh air and seek medical attention if irritation develops or persists.
